01 Work

Software Engineer · Working Student

09/2026 – 10/2026

Enpal · Berlin

- Prepared how-to guides and high-level application documentation, making internal tools and workflows accessible to non-technical users.

Venture Development · Intern

06/2026 – 08/2026

Enpal (B2B) · Berlin

B2B subsidiary of Enpal focused on selling solar/PV components (panels, inverters, and related hardware).

- Built 3-/6-/12-month product-performance reports and automated keep-or-remove decisions into the Shopify catalog, supporting a ~70% SKU reduction and more visibility for best sellers.
- Built a key-account order tool with live product data, gamification, and Teams review routing.
- Improved stock and price visibility with a live shared-warehouse ledger, daily updates across 10+ vendors / 500+ products, and a procurement workflow to keep the Shopify catalog consistent.
- Enriched order records with payment fees for more accurate margin calculations.

Co-Founder & Engineer

08/2025 – 04/2026

PN1 — AI Dog Translator · Berlin

- Architected and delivered the entire product stack end-to-end as the sole engineer (frontend, backend, and infrastructure).

Web Developer

01/2023 – 05/2023

e-drive Center · Berlin

German electric-mobility retailer and service provider offering electric vehicles, customer advice, and workshop services.

- Developed UI components and revamped the website design using PHP and Smarty.

Junior Frontend Developer

12/2020 – 07/2021

Inspakt · Istanbul

Digital-document platform for service businesses that helps replace paperwork with forms, document workflows, and digital signatures.

- Developed UI components and implemented designs using Angular and TypeScript.

Product Manager

07/2018 – 09/2018

LOY by IsBank Workup · Istanbul

Program designed to help founders find a team, build a startup, and learn together.
